

Testimonials for Lawrence Palevsky, MD FAAP

“You are a great doctor and a hero to parents everywhere who love their children and want to give them the best odds for a healthy, happy life.” Michelle D.

“We took our son to see him this past summer and all I can say is that he is absolutely wonderful. He is so attentive, extremely knowledgeable, and really listens to your concerns. He has a great knack of also pointing out things that you may not have noticed. We live about 1 and 1/2 hours north of Manhattan and it was worth the drive down to see him. He is also great with returning calls and emails. He really leans heavily toward healthy diets and taking a really well-rounded approach to your child's health. HIGHLY recommend him.” Mimi G.

“ I just wanted to say thank-you so much for having the courage to stand up for your beliefs. It really helps parents all over the country to have medical doctors like yourself who not only have the intelligence to question widely accepted philosophies, but also the bravery to stand up against those philosophies when they don't seem right. I'm sure there are many other doctors who are doubting the safety of vaccines, but don't have the courage to admit it. Thanks to people like you the truth will one day prevail.” Michelle D.

"There are not enough words to express my appreciation for Dr. Larry's partnership in raising my two children healthy from day one and helping me become the mother I am today. I recommend him to all my clients and friends." Debi T.

“I just had lunch with a friend of mine.....We were talking about our children and I was telling him the story of the miracle Doctor that came into our lives.....I know I mentioned this to you before, but there have been few people that have had such a profound effect upon our lives as you. Sometimes I cannot believe it. Suddenly, my eyes have opened to an infinite world of possibilities because you changed the course of my daughter's life. Forever. “ Jed M.

“You have a gift for communicating life-changing ideas and opening eyes that our culture has nailed shut. It is a gift not shared by many. I hope you continue to utilize your talent to change the lives of those around you who are willing to see for a very long time. I'm typically not an over-effusively sentimental person but this is my daughter. A precious gift of life that I only have one shot at helping, guiding and molding. Thank you for the powerful blueprint that goes way beyond what she eats. “ Jed M

"My six year old daughter Ella was diagnosed with asthma by her pediatrician and the pulmonary specialist and was prescribed steroids on a daily basis and for an undetermined period. I felt that this was not right for her and that these doctors were not paying attention to her. I was lucky to have a friend who recommended Larry and in one visit, after looking at her and talking to us for a couple of hours we decided to try a new diet and stop the medicine. Ella stopped coughing that night, her chronic cough, which had been bothering her for over two years was gone and finally I had a doctor who cared enough to look and listen and tell me what was really going on, that she was overweight and needed to change her diet. I am so thankful for meeting Larry, with some basic common sense and a little bit of discipline our daughter is now healthy, with no medication. I encourage parents to follow their instinct and explore other alternatives than just medication. I am happy I did." Eva O.

"Dr. Palevsky (Teddy affectionately refers to him as his "poop doctor"!) has been instrumental in the healing path we are on with Teddy's gut issues. He was wonderful to hang out with for two hours and learn from! I highly recommend an appointment with him." Janine R.

" Thomas could not have survived this journey without you, and either could I. You are the only person that has given me strength to continue and to believe in this process." Monica A.

" I do not think I have ever taken the time to thank you for your support, knowledge and patience that you have given to Dyan and I. When Aiden was diagnosed, I (as you probably know already) was quite stubborn to the whole "diagnosis", let alone making an appointment with a holistic pediatrician. My whole outlook has since changed after our first appointment. I speak about you and your practice at least 3-4 times per week letting other young parents with concerns know how great you are. You have helped my family grow, learn and deal with the situations that arise with Aiden. You give people information to really think about. You never made us feel uncomfortable or pressured us into doing anything that we did not feel comfortable with. Instead of pressing an issue, you would find a way to get your point across while understanding our concerns. It is nice to know that we have you in our corner for support. I am speaking for my entire family, THANK YOU!!!!" John L .

"I also wanted to tell you that I am glad I made the decision to come to you for G.....'s checkup. It was refreshing not to be spoken to as though I am below the doctor, and I enjoyed leaving the office without the feeling of being a horrible mother for questioning the status quo and choosing not to vaccinate. Previously, taking him to the doctor was quite anxiety provoking, and I hated the thought of passing that feeling on to him. It is so important for children and parents to learn how to make empowered choices for a healthy life, and I commend you for taking that challenge on. I have always been interested in holistic health and I look forward to learning more from you about how to keep my family healthy." Tara M.

“I have such gratitude for you joining us Thursday night. Your knowledge and passion to help children with autism is admirable. All in the audience were enlightened and encouraged by your valuable information. We need more medical doctors like you out there healing and protecting our children! “
Lisa R.

“I love Larry.....he is a visionary.” Leslie N., R.N.
