

Dear Friends,

Welcome to the Holistic Child Health Newsletter.

The goal of my holistic pediatric practice, and of this newsletter, is to inform and support parents to become more empowered as the primary health care providers for their children.

Extending far beyond Western medicine's conventional treatments, holistic medicine and mindful parenting allow us to boost children's natural immunity, support their optimum health and wellness, safely heal any illnesses, and prevent disease-without dangerous side effects. Holistic medicine provides us with the tools to nurture the physical, emotional, social and spiritual health of your children.

Over the coming months and years, I intend to use this newsletter to address some of your concerns as parents, share information that you might want to add to your knowledge base, and inform you of important issues and current events that are happening in the news, and in your area.

Together we can heal the whole child. Naturally.

Yours in Health,

Lawrence B. Palevsky, MD

In this workshop, you will hear discussions on vaccine science:

- What is current vaccine science and who is funding it and doing it?
- How do vaccines work, and have they done, and do they do what we're told they do?
- What role do vaccine ingredients play when injected into infants and children?
- What do the ingredients do to our children once they're injected?
- Do vaccines contribute to the development of chronic illnesses in children?
- How does the immune system work in babies and children?

Attendees will hear some of the answers to these questions, along with the research that questions whether vaccines are safe and effective, and whether the scientific process is even at work to prove the answers to these questions.

Attendees will also be asked to look at the issues that drive us to make the decisions we make, many of which come to us through fear, bullying, uncertainty, and a lack of knowledge, and to perhaps think alternatively about how illnesses occur and disappear.
