Dear Friends,

Welcome to the Holistic Child Health Newsletter.

The goal of my holistic pediatric practice, and of this newsletter, is to inform and support parents to become more empowered as the primary health care providers for their children.

Extending far beyond Western medicine's conventional treatments, holistic medicine and mindful parenting allow us to boost children's natural immunity, support their optimum health and wellness, safely heal any illnesses, and prevent disease-without dangerous side effects. Holistic medicine provides us with the tools to nurture the physical, emotional, social and spiritual health of your children.

Over the coming months and years, I intend to use this newsletter to address some of your concerns as parents, share information that you might want to add to your knowledge base, and inform you of important issues and current events that are happening in the news, and in your area.

Together we can heal the whole child. Naturally.

Yours in Health,

Lawrence B. Palevsky, MD

URGENT ACTION NEEDED

URGENT URGENT URGENT URGENT ACTION NEEDED TODAY!!!

Feds Set to Approve Covid Shots for Youngest Kids TODAY!

Toby Rogers (<https://tobyrogers.substack.com/>) breaks news that the feds will hold an unannounced meeting tomorrow to grant an EUA for Covid shots for Children 6 months to 5 years:!

FROM TOBY:

BREAKING NEWS: CDC launches sneak attack; the ACIP will meet TODAY (Friday, June 17) and Saturday, June 18 to extend the mRNA Final Solution to little kids

The White House has kept these meetings a secret until now

I'm the first to report this breaking national news:

This morning I listened to the meeting of the National Vaccine Advisory Committee. Melinda Wharton gave her update from CDC... and they have scheduled a special two day meeting of the Advisory Committee on Immunization Practices (ACIP) for TOMORROW (Friday, June 17) and Saturday (June 18). The agenda is

Friday they will discuss safety, immunogenicity, and efficacy of Moderna in kids 6 months through 5 years of age AND Pfizer in kids 6 months through 4 years of age. Saturday they will vote. The entire process is set up to rubber stamp the VRBPAC meetings from yesterday.

When White House "Covid-19 Czar" Ashish Jha went on TV earlier in the week and said that these shots would be available by June 19, he surely knew that these meetings were in the works. But they kept them secret from the public until Melinda Wharton let the cat out of the bag this morning.

Apparently, the CDC is going to hold off on debating Moderna in kids 6 to 17 years old until next week (they have another meeting scheduled for June 22 and 23). The CDC has decided to target the littlest kids first.

What is to be done?

Click on this link to send emails to the members of the ACIP and other key decisionmakers stating your opposition to this new assault on our children.

<https://www.votervoice.net/AUTISMACTION/Campaigns/95762/Respond>

Let's light 'em up right now. Below are talking points and contact info for the people who will be involved with the ACIP meeting tomorrow and Saturday.

GET ON THE PHONE!!!

Talking Points

Feel free to compose your own message or share your story with the federal officials listed below. Alternatively you can copy and paste these talking points into your message. Phone calls and faxes are good too.

Subject line: REJECT the Moderna and Pfizer EUA applications to inject mRNA into little kids

1. There is no Covid emergency for children under five years old.

Children have a 99.997% recovery rate and a body of medical literature indicates that almost zero healthy children under five years old have died from Covid.

- A large study conducted in Germany showed zero deaths for children under 5 and a case fatality rate of three out of a million in children without comorbidities.
- A Johns Hopkins study monitoring 48,000 children diagnosed with Covid showed a zero mortality rate in children under 18 without comorbidities.
- A study in Nature demonstrated that children under 18 with no comorbidities have virtually no risk of death.

2. The data in connection with the Moderna and Pfizer EUA applications in kids is abysmal

- The Pfizer clinical trial in kids 6 months to four years old failed in December 2021 and failed again in February 2022. Adding a third dose did not solve the underlying problems with this shot in this age group.
- Against the Omicron variant, after one month, the Pfizer shot was only 12% effective in kids 5 to 11, after 6 weeks vaccine effectiveness was a shocking MINUS 41% (vaccinated kids were significantly more likely to catch Covid than the unvaccinated). Recommending a vaccine with negative efficacy is insanity.
- Finland, Sweden, Denmark, and Norway have all suspended the use of the Moderna shot in young people because it leads to myocarditis. The FDA risk benefit assessment cited 26 studies showing that mRNA shots in general, and Moderna in particular, increase the risk of myocarditis.

3. The harms from mRNA shots in children are catastrophic.

There are now 49,283 VAERS reports of adverse events in children following Covid shots including 114 reports of death, 457 reports of permanent disability, and 1,326 reports of myocarditis. These reports likely understate harms by a factor of 41 to 100.

You have a professional and moral obligation to reject the Moderna and Pfizer EUA applications to inject mRNA into little kids.

People to contact:

Please reach out and find a way to awaken the moral core of these 26 people:

Political appointees, key CDC staff, and a Pfizer representative:

(I searched high and low for her contact info and did not find it. Is she retired? If you find an email address or phone number please add it in the comments below. Thanks.)

Veronica V. McNally, J.D.

(I'm not even sure what to say about this one. She lost a daughter to whooping cough at 12 weeks. I take her claim at face value and I grieve for her loss. But ACIP has no voting members who are parents of vaccine injured kids and that's a double standard that is not fair. Perhaps just pray for this person.)

ABOUT DR PALEVSKY

Dr. Palevsky is a NYS licensed pediatrician, who utilizes a holistic approach to children's wellness and illness. Dr. Palevsky received his medical degree from the NYU School of Medicine in 1987, completed a three-year pediatric residency at The Mount Sinai Hospital in NYC in 1990, and served as a pediatric fellow in the ambulatory care out-patient department at Bellevue Hospital, NYC, from 1990-1991. Since 1991, his clinical experience includes working in pediatric emergency and intensive care medicine, in-patient and out-

patient pediatric medicine, neonatal intensive care medicine, newborn and delivery room medicine, and conventional, holistic and integrative pediatric private practice.

Dr. Palevsky is a diplomate of the American Board of Integrative Holistic Medicine, and Past-President of the American Holistic Medical Association. He received his pediatric board certification in 1990, and passed his pediatric board recertification exams in 1997, 2004, and 2011.

In his current practice in Northport, Long Island and Manhattan, NYC, Dr. Palevsky offers well-child examinations, consultations and educational programs to families and practitioners in the areas of preventive and holistic health; childhood development; lifestyle changes; nutrition for adults, infants and children; safe, alternative treatments for common and difficult to treat acute and chronic pediatric and adult conditions; vaccination controversies; mindful parenting; and rethinking the medical paradigm. Additionally, he teaches holistic integrative pediatric & adolescent medicine to parents, and medical and allied health professionals, both nationally & internationally, and is available for speaking engagements worldwide.
